

## Client Case Study

# World Class Leader in Development & Production of Cosmetics & Body Care Products

## *E-Business Suite Reporting Migration to Oracle BI Cloud*

### Business Situation

- Needed rapid development framework
- Move reporting away from E-Business Suite (EBS)
- Didn't want to manage H/W
- Allow Mashups when needed

### BIAS Approach

- Worked with Client stakeholders to gather reporting requirements
- Loaded EBS data into Oracle BI Cloud Services Database using the built-in Data Sync capability and scheduled it to run nightly
- Built and tested reports and dashboards using BIAS Offshore team
- Operationalized the process and conducted performance tuning
- Onshore Coordination and Offshore Delivery to drive down the costs while keeping high pace of delivery

### Results

- New capabilities saved business users substantial time and manual labor in compiling data daily from EBS and building reports
- Reliable availability of reports every morning
- Build their critical supply chain reporting used for decision making under budget and within time constraints
- Developed the rapid development foundation for subsequent phases
- Exceeded customer expectations
- Client is highly reference-able and is funding further phases
